

## CASE STUDY

# Andres'Tito Clavijo Jr.

Thank you for taking the time to answer these questions.

### **What challenges/problems were you having with your investing that necessitated a change?**

The main challenge was finding a process that fitted my lifestyle. I tried a number of different approaches but found they did not deliver on results and also required a lot of screentime. There is a lot of overpromising and underdelivering in this space which is disheartening especially when you are wasting time and money. I work and have a family so time is short as you probably imagine. We also enjoy travelling and exploring the great outdoors so it was essential for me to find a style of investing that could allow me to continue living my life but that also maximised the returns on my money and savings.

### **What made our solution stand out over others that you researched?**

The primary reason was that they taught trend following. I was familiar with this approach with the research I had done over the years but I had never found anyone who was able to teach it until I came across Sublime Trading through their social media content. I feel very fortunate to have found them as the internet is rife with get-rich-quick schemes and day trading. I have tried it all and I can tell you it is just not worth the hassle. As the saying goes, if it is too good to be true then it is and I have certainly found that out through my own choices. The short-term approach is not only time consuming but also high-risk which just does not make for a pleasant lifestyle. You will either become a useless boss, employee, husband, father, friend or a combination. With Sublime Trading, I had everything I was looking for, a trend following approach that was proven to get me results and that I could adapt around my lifestyle. The peace of mind that comes with this is liberating.

### **How did our team help with the learning and implementation of the methodology?**

Getting to grip with the methodology is unbelievably streamlined. You start with a video syllabus that takes hours to complete and lays out their strategy in detail with total transparency. All the finer details are explained such as the logic behind their bespoke tools, exit and entry points, risk management and compounding. The trading plan they share at the end of the syllabus brings it all together and helps bring a mechanical approach. If you are struggling with emotions like I was, then this trading plan is what you need. We then have the live community and weekly webinars to ask questions that Zaheer and Kola are involved in daily. This was a huge plus as they have not left the community to be run by other members. From experience, this is all too common and why many so-called trading communities are total mayhem. Sublime Trading is a pleasant learning experience and an environment that allows you to grow into a complete investor.

### How was the ongoing mentoring & what difference did it make with the learning and implementation?

The learning of the process is straightforward. It teaches you how to identify good assets using technical analysis but then also how to execute a strategy to make a profit. At this point, this is all theory. The support to go from theory to implementation, which is when the emotions and the self-doubt start kicking in, is of a level I have never experienced and you won't find anywhere else. When it is your money on the line and past experiences have not been favourable, it is natural to be fearful to start taking positions even if you know you have found the right process. The ongoing mentoring that Zaheer and Kola provide alleviates all of that. They have created an environment to take positions with confidence and to profit while you learn.

### What % growth have you achieved to date to show the success you have enjoyed with our service?

I have seen a 12% growth per annum on my account which I am over the moon with. I have done the get-rich-quick schemes and the short-term trading and I repeat that none of it works. I am conservative when it comes to my risk allocation. Slow and steady wins the day. Sublime Trading has laid the rules out very clearly so if you want to be more aggressive and see larger returns but still have your capital well protected, you certainly can do that.

I have seen

**12% growth**  
per annum on my  
account

### How will you use our solution going forward to grow your wealth?

I have plenty of life ahead of me so I intend to keep on working and investing the Sublime Trading way which will compound into a very healthy sum of money by the time retirement comes around. My conservative approach will build me a very handsome pot that I can leave behind for my kids, my motivation in life. I will be a lifelong member of this exceptional investing community.

Investing in the financial markets remains one of the most popular ways for busy professionals to build wealth. The number one challenge however for those earning a decent salary is not being able to invest it correctly.
